

DISTRICT OF COLDSTREAM

Engineering Technologist

Regular Full Time Union Position

Position Summary

This newly created role is an exciting opportunity for a motivated technical professional who enjoys variety, collaboration, and meaningful impact. As the Engineering Technologist, you will support a wide range of municipal engineering functions, contributing to capital and operational projects, utility upgrades, road and drainage improvements, and development-related processes.

In this role, you will also provide essential administrative and technical support to Infrastructure Services. This includes assisting with procurement activities, preparing reports for Council, maintaining records, conducting field studies, site inspections, and supporting policy and bylaw development. Reporting to the Director of Infrastructure Services and working closely with the Infrastructure Services Superintendents, you will play an integral role in supporting ongoing operational needs.

You will act as a key point of contact for residents, consultants, developers, and internal teams to offer clear and knowledgeable guidance on engineering projects, municipal services, and related processes.

This is an excellent opportunity to join the District at a time of growth and innovation. The successful candidate is anticipated to begin in June.

Required Education and Experience

- An accredited 2-year diploma in applied science or civil engineering technology at a recognized technical institute or equivalent as a Civil Engineering Technologist.
- Minimum of two years' experience in a municipal engineering or technologist role, with a focus on water and sewer infrastructure.
- Eligible for Membership in the Association of Applied Science Technologists and Technicians of BC

Preferred Education and Experience

- Contract Administration experience.
- Ability to create drawings using AutoCAD.
- Ability to use GIS for performing geo-spatial data processing, spatial analysis, map interpretation, and creating maps and graphics for a variety of uses.
- Experience working with a consulting organization or other municipality on construction or land development projects is considered an asset.

We thank all candidates for their interest; however, only those selected for interviews will be contacted
